Categories: Comments Received

For the attention of Head of Development Control

Dear Madam,

I attended the Committee meeting on 28th April, 2026 concerning the above application. I share the Chairman's concerns that a comprehensive drainage plan for the site was not submitted with the application. As such a plan must be fundamental to the determination of the application, I seek your assurance that when the said plan has been submitted to the Council, it will be available for public comment as have been all other aspects of the proposed development.

I look forward to receiving your confirmation regarding this matter.

Yours faithfully
