REASONS FOR PROPOSED TREE WORK

T1 Yew tree in next door property at 62 Lower Street:

- lateral prune overhanging branches back to clear fabric of building by a maximum of 0.5m on east side of main stone wall
- fade lateral prune into southern, northern and high canopy
- please note that there will be no height reduction to the tree

The overhanging branches are encroaching onto the roof line of the property and the berries and leaf debris are falling into the small patio area and gutter
