SUMMARY OF COMMENTS & RECOMMENDATION:

1. We cannot recommend the discharge of Condition 7 as there is no soft landscape information submitted. Please provide details of proposed planting along the western façade of the existing stables and eastern boundary as illustrated in the site plan and highlighted in the extract below.

   Hedgerow planting location and whip sizes have been indicated within the updated landscaping layout, with thanks. However, further information is required in order to discharge Condition 7, including species in latin names and planting densities. We recommend species suitable for the drier, sandier soils of the landscape character area, D1 - Amberley to Steyning Farmlands, such as Fagus sylvatica. We additionally recommend 5no. whips per linear meter, offset by approximately 30cm.

2. In addition, we note the red line boundary appears different in both plans and note as result the gravel area / domestic curtilage has been enlarged. See below.

   Not addressed, however this outstanding point will be deemed as minor if the landscape strategy above is secured.
