Subject: Application for tree work in conservation area

[REDACTED] [REDACTED]

Please find detailed below an application to cut back tree in a conservation area over the coming winter period. It is located on my property and adjacent to my bungalow. This has been requested several times previously and is usually approx 3 years apart. According to my records I believe last time permission was given was November 2023.

The tree is situated just a couple of feet to the outside right of the conservatory (which is situated at front of property) and overhangs conservatory roof. Cables from a pylon to the house also run through its branches. Neither the tree surgeon nor your representative who has visited in the past can definitively identify its species so I am sorry I am not sure about this exactly. As before the request is to take it back to the previous reduction points.

I am attaching a photo of the top of the tree and a drawn map of location.
I hope this is enough information but please let me know if more is required.

My details are: Lesley Foster, Jasmine Cottage, The Street, Bramber, West Sussex BN44 3WE. [REDACTED]
