

DC-26-1038 - Half Hidden, London Road, Pulborough - Removal of hedgerow and erection of a featherboard fencing with concrete posts.

Wed 22/07/2026 11:01

The Trees team were consulted on the above application for a fence erection following hedge removal on the boundary of the property.

I can confirm that the hedge is of typical clipped cypress, suffering somewhat in health due to the usual urban stressors of repeated pruning, water availability and subsequent pest (aphid) infestation.

The hedge is likely to continue to deteriorate in condition and will not provide a longer term attractive boundary feature. Its replacement with a new hedge to retain a soft, vegetated streetscene, would be the most positive landscape change if the planning process enables this approach.

Regards

Andy
