Ref: DC/24/0335

To whom it may concern- I already have permission to cut down the Sycamore tree and take branches OFF Beech that overhang our side of drive and window at cherrymead and have done some of this work already, the sycamore has been reduced by aprx two thirds and have taken some of the overhanging branches from the two Beech trees but as the permission runs out beginning of April and I have decided that I now want to remove the trunk completly and remove two more branches from the Beech trees I feel I should reapply in case I am un-able to get this work done before the permisson runs out in April.

Yours Sincerly
