

Newly moved in and residents are getting the garden into a manageable state.

G2: The two stems of these acers have twisted around each other and will only become more of a risk the longer they are left. Trees are also damaging the fence.

T3: Removal of deadwood.

T4: Removal of a twin stem self seeded Holly along the fence line.

T5: Removal of deadwood.

I don't believe any these would affect the amenity value of the area.
