Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Privacy Light and Noise
Comments:	I've selected 'object' based on the following observation: We believe that by adding a dormer window to the rear of the property, it will enable the occupants a direct view into our back garden, thereby invading our privacy. Prior to purchasing our property, number 8 Scholars Walk in 2013, we asked to view it from the vantage point of the upstairs windows of number 2 the Boulevard. At the time, this was the marketing suite. We could see that our back garden was not able to be seen by the occupants. This was a major factor in our purchase

decision and the reason we did not select a property on Highwood that was overlooked.

If the loft is converted with a dormer window to the rear, the additional height will allow a view into our private space.

We do not object to the front dormer windows or the roof lights at this time, as we assume those additions will not impinge on our privacy but we do need to see the details of the plan.

I cannot see how to view the plans on your site so ask for them to be shared please.
Many thanks

Kind regards
