| Stance: | Customer made comments in support of the Planning Application |
| Reasons for comment: | - Design<br>- Other |
| Comments: | Having lived in Tower Hill previously for a number of years I know the area well and consider the proposed development of just 9 houses would be a welcome addition, fitting in well with the existing pattern of this settlement. The proposals are well considered and thoughtfully designed to reflect the local Sussex vernacular. The site is well screened around its boundaries and would hardly be noticed from Tower Hill itself. The development |

would provide the much needed type of housing that would never be found on a large new development and with just 9 houses the development would be completed quickly. It would cater for those who would like to move into a traditionally designed but modern family home that is energy efficient and low maintenance, all in a spacious setting in an already well established area close to Horsham town with all its facilities.
Accordingly I trust that the Council will take the opportunity to permit this application.

---

Kind regards
