Dear Sir/Madam,

Proposal: Demolition of existing single storey dwelling and erection of new 2-storey dwelling.

Site address: Brookside Farm, Little Orchard Dagbrook Lane Henfield West Sussex

Thank you for your correspondence, please see our comments below regarding the above application

Proposed works involve demolition:

In order to protect and safeguard the existing water supply apparatus, Southern Water requests formal notification of any proposed demolition works prior to such works being undertaken.

Connection to water distribution main:

Our investigations indicate that Southern Water can facilitate water supply to service the proposed development. Southern Water requires a formal application for a connection to the water supply to be made by the applicant or developer.

To make an application visit Southern Water's Get Connected service:

<https://developerservices.southernwater.co.uk> and please read our New Connections Charging Arrangements documents which are available to read on our website via the following link www.southernwater.co.uk/developing-building/connection-charging-arrangements

Insufficient Information provided:

Construction of the development shall not commence until details of the proposed means of foul and surface water drainage disposal have been submitted to, and approved in writing by the Local Planning Authority in consultation with Southern Water.

SuDS:

The supporting documents make reference to drainage using Sustainable Drainage Systems (SuDS). Where SuDS form part of a continuous sewer system, and are not an isolated end of pipe SuDS component, adoption of SuDS will be considered if requested by the developer if they comply with: Design and Construction Guidance (Appendix C), CIRIA guidance and Southern Water SuDS Guidance available here:

<https://www.water.org.uk/sewerage-sector-guidance-approved-documents/>

<https://www.ciria.org/ItemDetail?iProductCode=C753F&Category=FREEPUBS>

<https://www.southernwater.co.uk/media/14nd13db/suds-final-080824.pdf>

Where SuDS rely upon facilities which are not adoptable by sewerage undertakers the applicant will need to ensure that arrangements exist for the long-term maintenance of the SuDS facilities. It is critical that the effectiveness of these systems is maintained in perpetuity. Good management will avoid flooding from the proposed surface water system, which may result in the inundation of the foul sewerage system.

Thus, where a SuDS scheme is to be implemented, the drainage details submitted to the Local Planning Authority should:

- Specify the responsibilities of each party for the implementation of the SuDS scheme.
- Specify a timetable for implementation.
- Provide a management and maintenance plan for the lifetime of the development.

This should include the arrangements for adoption by any public authority or statutory undertaker and any other arrangements to secure the operation of the scheme throughout its lifetime.

This initial assessment does not prejudice any future assessment or commit to any adoption agreements under Section 104 of the Water Industry Act 1991.

No existing public sewer in vicinity:

The nearest public sewer is 718 metres away from the proposed development. Under New Connections Charging it is the responsibility of the developer to provide the sewerage infrastructure up to the point of practical connection. The applicant is advised to investigate the feasibility of this connection or examine alternative means of foul sewage disposal in consultation with the appropriate authorities.

Other means of foul disposal proposed in proximity of existing Network:

Under the first-time sewerage guidance the EA expect people to connect to a public sewer if the dwelling is within 30m of our network, this guidance can be found here: General binding rules for small sewage discharges (SSDs) with effect from January 2015 - GOV.UK (www.gov.uk)
Your development is further than 30 m away from our network, you may want to consider a private discharge or a connection to our network in these circumstances. Please familiarise yourself with EA guidance before progressing your drainage solution further.

Tree Planting:

We have restrictions on the proposed tree planting adjacent to Southern Water sewers, rising mains or water mains. Reference should be made to Southern Water's publication "A Guide to Tree Planting near water Mains and Sewers"

(https://www.southernwater.co.uk/media/pddob0vn/ds-tree-planting-guide-1_nwm.pdf) and the Sewerage Sector Guidance (<https://www.water.org.uk/sewerage-sector-guidance-approved-documents/>) with regards to any landscaping proposals and our restrictions and maintenance of tree planting adjacent to sewers, rising mains and water mains.

Condition:

'In order to protect public apparatus, Southern Water requests that if consent is granted, the following pre commencement condition is attached to the planning permission; The developer must advise the local authority (in consultation with Southern Water) of the landscaping proposals in proximity of public apparatus in order to protect it in accordance with Southern Water's guidance, prior to the commencement of the development.

It is possible that a sewer now deemed to be public could be crossing the development site. Therefore, should any sewer be found during construction works, an investigation of the sewer will be required to ascertain its ownership before any further works commence on site. If this happens, please call our Customer Service Desk on 0330 303 0119.

For further assistance, please contact Southern Water, Southern House, Yeoman Road, Worthing, West Sussex, BN13 3NX (TEL: 0330 303 0119)
