Comments:	We have read the comments from Southern Water regarding this application and would appreciate if you would take our comments into consideration. We have contacted Souther Water regarding the manhole out side our property on numerous occasions asking why when we have heavy rainfall it bubbles out of the manhole and pours down Wineham Lane, but have never had a satisfactory reply. We cannot see how further connections to the sewer would be acceptable and would only cause more flooding on the Lane which ends up at the first bridge going south on the lane which then floods the road making it extremely hazardous and if it is sewer water this will end up in the river polluting it. Also taking away more natural surface water absorption by building two massive properties on the land would not help the problem either. Southern Water appear to be more interested in profiting from this application rather than the environmental impact it will cause. Kind regards [redacted]

Kind regards
