

Branch Exterior: Shopfront

External Device (ATM) Surrounds

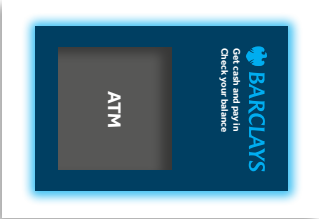

Note:

External Devices are to be installed so that the key pad for the device is 850mm from floor level (exterior)

Note:

Alternative finishes for the surrounds to external devices can be considered, subject to site conditions. Typically, a white surround is the standard, but a blue version can be used if deemed necessary (existing device etc). In heritage / listed locations, it may not be possible to install a surround. These are by exception.

Installation Examples:

Note
All shopfront materials are to be composed of non-combustible materials with all required fire certification documentation
