Pedestrian access to Badgers Hollow

The map below shows the site boundary in red. As you can see there is a track adjacent to the woodland. This is used locally as a bridle way and provides safe walking access to Ashington where there are bus services and also links to existing footpath network.
Photos of the track are below. From the track there is a grass verge along Crays Lane so visitors could walk to the vehicle access to Badgers Hollow. Alternatively there will be a path through the woodland created to allow access to Badgers Hollow directly from the track which eliminates the need to walk along Crays Lane entirely.

Entrance from Crays Lane to track

Grass verge along Crays Lane. (Between end of track and Badgers Hollow entrance)

Images of track, clearly used as a bridle way, narrowing as you go further up looking more like a footpath. Clearly unpassable by vehicles.

Stile from the track onto footpath. Image of Badgers Hollow woodland next to track where a private footpath will be created.
