We have the following comments on the above:

- We assume the extension described is required for the existing family and not to be used for sub-letting which could cause parking issues in an already difficult vehicular access area, and could cause potential access problems for emergency vehicles.

- No. 12 Windacres is substantially identical to No. 14, and the proposed work will have a negative impact on the aesthetic appearance of those two attached houses in that part of Windacres.

- The proposed extension will not, we think, create a good precedent in this relatively small development.
