Hello Nicola,

I received a letter today updating on the planning of 152 dwelling to the land west of Ashington School. I've been aware of this proposal for several years and wanted to ask about the change of plans to access to the site?

Initially the access point was next to the Ashington Church, which is not practically possible and church lane would not accommodate any more traffic.

Can you confirm if access to the proposed planning area has changed or remains the same?
I have looked at the public access site but cannot see any documents or information outlining this.

My concern is also about the availability of local conveniences as there is only a small Coop in Ashington which already has difficult access and I can't foresee how it would accommodate 152 homes in the village.

With kind regards,

[REDACTED]
