

DELEGATED APPLICATIONS - ASSESSMENT SHEET

APPLICATION NO./ADDRESS:

DC/26/0016

24 Burns Close, Horsham, West Sussex, RH12 5PF

DESCRIPTION:

Erection of a two storey side extension, erection of a front porch, alterations to fenestration, and associated alterations to access and landscaping.

RELEVANT PLANNING POLICIES

The National Planning Policy Framework (NPPF)

Horsham District Planning Framework (2015):

Policy 32 - Strategic Policy: The Quality of New Development

Policy 33 - Development Principles

Neighbourhood Plan:

North Horsham Neighbourhood Plan area was designated, then the area voluntarily withdrew the designation.

Horsham District Local Plan (2023-40) (Regulation 19):

Policy 19: Development Quality

Policy 20: Development Principles

REPRESENTATIONS AND CONSULTATIONS RESPONSES

Where consultation responses have been summarised, it should be noted that Officers have had consideration of the full comments received, which are available to view on the public file at www.horsham.gov.uk.

Consultations:

Natural England: Standing Advice:-

It cannot be concluded that existing abstraction within the Sussex North Water Supply Zone is not having an adverse effect on the integrity of the Arun Valley SAC/SPA/Ramsar sites. Developments within Sussex North must therefore must not add to this impact and one way of achieving this is to demonstrate water neutrality. The definition of water neutrality is the use of water in the supply area before the development is the same or lower after the development is in place.

To achieve this Natural England is working in partnership with all the relevant authorities to secure water neutrality collectively through a water neutrality strategy. Whilst the strategy is evolving, Natural England advises that decisions on planning applications should await its completion. However, if there are applications which a planning authority deems critical to proceed in the absence of the strategy, then Natural England advises that any application needs to demonstrate water neutrality.

Southern Water: Comment.

The exact position of the public assets must be determined on site by the applicant in consultation with Southern Water before the layout of the proposed development is finalised.

Parish Comments:

No objection

Representations:

None received

HUMAN RIGHTS AND EQUALITY:

The application has been considered having regard to Article 1 of the First Protocol of the Human Rights Act 1998, which sets out a person's rights to the peaceful enjoyment of property and Article 8 of the same Act, which sets out their rights in respect to private and family life and for the home. Officers consider that the proposal would not be contrary to the provisions of the above Articles.

The application has also been considered in accordance with Horsham District Council's public sector equality duty, which seeks to prevent unlawful discrimination, to promote equality of opportunity and to foster good relations between people in a diverse community, in accordance with Section 149 of the Equality Act 2010. In this case, the proposal is not anticipated to have any potential impact from an equality perspective.

PLANNING ASSESSMENT:

The application has been assessed on the basis of a site visit and the submitted details, together with the planning history of the site and adjoining properties, available images and photographs supplied by the agent. These details were considered sufficient to allow the application to be properly considered and determined.

Character and Appearance

Policies 32 and 33 of the HDPF seek to ensure that development promotes a high standard and quality of design in order to enhance and protect locally distinctive characters. The policies also seek to ensure that the scale, massing and appearance of development relates sympathetically with the built surroundings, landscape, open spaces and routes within and adjoining the site, including any impact on the skyline and important views.

The application seeks planning permission for the erection of a two storey side extension, erection of a front porch, alterations to fenestration, and associated alterations to access and landscaping.

The application site benefits from a relatively substantial side curtilage. This arrangement creates a sense of openness to the junction which is reflected at other comparable corner sites in the locality. The proposed extension would diminish this existing openness. It is considered that the resulting scheme would retain sufficient separation from the site boundary so as to ensure it did not appear cramped or out of keeping with the character or appearance of the surroundings. In views north and south along Burns Close the extension would be seen against the backdrop of surrounding development and would not stand out as being intrusive or unduly dominant. The materials, style, and alignment of windows are proposed to match those of the existing dwelling, ensuring visual continuity and a high standard of design.

The proposed porch would be of a modest scale and is considered to be of an appropriate design, form and siting that would appear a subservient and sympathetic addition to the front of the property. The porch canopy would not stand out as intrusive or unduly dominant in views along Burns Close and no wider visual impacts are anticipated.

The proposal would be a clearly subservient addition and is considered to be of a design, form and scale which is appropriate to the character and appearance of the existing dwelling, and which would not harm the character or appearance of the wider area. It is therefore considered that the visual impact of the proposal is acceptable and would accord with the above policies.

Impact on Neighbouring Amenity

Policy 33 of the HDPF states that permission will be granted for development that does not cause unacceptable harm to the amenity of the occupiers/users of nearby properties and land.

It is considered that the siting and layout of the proposed extension and the resulting relationship with adjoining properties would be sufficient to prevent any unacceptable harm to neighbouring amenity.

Water Neutrality

A 2021 Position Statement from Natural England identified that it could not be concluded with the required degree of certainty that new development in the Sussex North Water Supply Zone would not have an adverse effect on the integrity of the Arun Valley SAC, SPA and Ramsar sites. As a consequence, and to comply with the legal duties set out in the Conservation of Habitats and Species Regulations 2017 (known as the Habitat Regulations), all new development since has been required to demonstrate water neutrality.

On 31st October 2025 Natural England formally withdrew the 2021 Position Statement, citing a package of measures that they were satisfied would safeguard the Arun Valley sites. Principal amongst these measures is a reduction in the Southern Water abstraction licence 'by March 2026'. However, given the licence change has not yet taken place Horsham District Council, as competent authority under the Habitats Regulations, cannot yet be certain that new development will not result in adverse impacts on the Arun Valley sites.

To ensure development can come forward as water neutral in the meantime, the Council has agreed with Natural England to use the significant water savings made by Southern Water in 2024/25 through their programme of leakage reduction (amongst other measures). This has generated some 3,240,000 litres per day of water savings that can now be attributed to new development without increasing water abstraction in the Arun Valley beyond baseline. These savings were previously to be used to launch the Sussex North Water Certification Scheme (SNWCS), however following the withdrawal statement SNWCS will no longer be launching. Natural England standing advice dated 10 November 2025 raises no objection to using these savings to enable development to come forward. The standing advice clarifies that it functions as Natural England's formal response pursuant to Regulation 63(3) of the Conservation of Habitats and Species Regulations 2017 to all relevant planning applications which seek to achieve water neutrality using the above Southern Water savings.

Officers have undertaken an Appropriate Assessment which demonstrates that the anticipated increase in mains water consumption from this development, alongside all other development granted since the 31st October 2025, will not exceed 3,240,000 litres per day.

Accordingly, Officers consider that the proposed development will not have an Adverse Effect on the Integrity of the Arun Valley Site, either alone or in combination with other plan and projects, thereby complying with Regulations 63 and 70 of the Conservation of Habitats and Species Regulations 2017, HDPF Policy 31, and paragraph 193 of the NPPF.

Biodiversity Net Gain

In accordance with the Biodiversity Gain Requirements (Exemptions) Regulations 2024, all householder applications are current exempt from the statutory requirement to demonstrate a 10% net gain in biodiversity.

Conclusion

The proposal is considered to comply with relevant local and national planning policies and is therefore recommended for approval.

Recommendation: Application Permitted

Conditions:

- 2 **Standard Time Condition:** The development hereby permitted shall begin before the expiration of three years from the date of this permission.

Reason: To comply with Section 91 of the Town and Country Planning Act 1990.

- 3 **Regulatory Condition:** The materials to be used in the development hereby permitted shall strictly accord with those indicated on the approved existing and proposed elevations plans drawings numbered BC/H/25/PL/L20 and BC/H/25/PL/L21B REV B received 07.01.2026.

Reason: To enable the Local Planning Authority to control the development in detail in the interests of visual amenity and in accordance with Policy 33 of the Horsham District Planning Framework (2015).

POSITIVE AND PROACTIVE STATEMENT

Statement pursuant to Article 35 of the Town and Country Planning (Development Management Procedure) (England) Order 2015. The Local Planning Authority has acted positively and proactively in determining this application by assessing the proposal against all material considerations, including planning policies and any representations that may have been received, in order to be able to, where possible, grant permission.
