Categories: [REDACTED]

Hi Sean, here is my quote to remove the trees causing severe damage along the East side wall of the garden.

Due to severe wall damage and a large leaning ivy covered limb leaning towards the neighbours garden, I concur that the 4 Sycamore trees need to be removed before more irreparable damage is done. Trees themselves are in reasonable health except the large amounts of ivy growing on them but this only adds to the weight and pressure and if the wall gives way you'll have a lot of waste to move and damage to repair.
