Dear Sirs

I am writing this email to strongly object to the proposal of the new building work on the area of outstanding natural beauty. The amount of precious wildlife will be affected dramatically. Since living in the area for the past 14 years, I have noticed a huge decline in the amount of wildlife I see when I walk my dog on the paths in this area. Everything from the smallest rodents to the large variety of birds that frequent the area and diminishing. If you allow this build we will lose so much more.

This is apart from the amount of traffic it will cause. Horsham already has a cramped schools system, from Nursery to College. Doctors surgeries and hospitals are full to the brim and cannot possibly run efficiently and effectively with more people arriving into our amazing Town and area.

With the building work continuing to grow in the Bohunt School area, why do we need more houses? I understand that ll new builds have to put in "affordable" housing, so surely that cannot be used as a bonus? The building work that runs from the Bohunt School area to Kilnvale development will surely be sufficient?

I openly and honestly oppose this build and would like to keep our community safe, including the animals that have lived there for centuries!

Thank you
