Hello

Thank you for your letter dated 27 August 26 concerning the above planning application.

I fail to see how anything has changed and there is no indication of an amendment on your website that I can see.

I put in my objections via your website in January and my objections have not changed nor do I see that my concerns and those of local residents have been allayed.

My main worry is still the danger to pedestrians, including mums with toddlers, using Church Lane to get to the toddler group in Mary Bevan Hall, plus walkers to and fro the river walk plus church goers or just residents with property in the area. Increased traffic is the threat.

Animals and bird life currently abound but would be displaced with yet another threat to their habitats.

I strongly object to any development on Church Farm and furthermore the area is discounted in the Neighbourhood Plan.

I will copy this to your website.
