Dear Sirs

DC/26/0933

Please find my comments repeated here , together with the photographic evidence that it was not possible to upload to your portal. The photographs show the overwhelmed drains on Chapel Road because of floodwater running off the field that is proposed for development:

Flooding. Contrary to the GPA3 Assessment, the proposed site is not ‘broadly flat’ as stated. It is on a slope of clay based soil which does not drain easily. Already, in times of heavy rain, a great deal of surface water runs down the fields north of Smugglers Lane onto Chapel Lane. The village shop was badly damaged by flood water a few years ago and the drains are not able to cope with the current surface run off during heavy rainfall (see attached photograph showing water gushing out of the field onto Chapel Road). Building on the proposed field would increase the likelihood of flooding on adjacent housing, including the local shop and the following listed buildings: Bennetts, Blacksmith's Cottage, The Queen's Head and Heron’s Reach (at the village shop). The IAWPA flood risk assessment shows that on 9.2.26, Well 2 was full (water was at 0.00m i.e. ground level) so that all rainwater was running off the surface and onto Chapel Road. This already discharges into the existing, overwhelmed and inadequate foul sewage network. Covering the area with buildings and roads will obviously make this worse.

Regards
