1 Introduction

- 1.1 Bellamy Roberts has been instructed by MCA Architects on behalf of Antonio Avenue Ltd. to prepare a Framework Travel Plan (FTP) in support of the development of up to 100 dwellings, with access to be determined at Toat Café at Stane Farm, Stane Street, Pulborough.
- 1.2 The proposed development would comprise up to 100 residential dwellings, pharmacy, shop, café and open space including LEAP and Natural Greenspace.
- 1.3 A copy of the illustrative site plan prepared by MCA Architects has been attached at **Appendix 1**.
- 1.4 This Report will outline the objectives of the FTP applied to the residential use of the site, which are ultimately to reduce the number of single occupancy car trips and promote the use of more sustainable modes of travel. The aim being to sustain those vehicle trip rates outlined in the Transport Assessment (TA).
- 1.5 The measures that are to be introduced in order to achieve this target are detailed in this document, along with a timeframe for the implementation of the various measures.
- 1.6 A Travel Plan Co-ordinator (TPC) shall be appointed to provide ongoing management for the FTP. The TPC will be supported by the Residents Association who will meet regularly to discuss the progress of the FTP. Once appointed, the identity of the TPC and their contract details will be made known to WSCC before first occupation of the site. The TPC will be in place three months before first occupation of the site.
- 1.7 Following the meeting, the TPC will prepare a document detailing the progress of the Plan and the strategy for going forwards.
- 1.8 This FTP has been prepared in accordance with the current Horsham District Council (HDC) and West Sussex County Council (WSCC) Guidance and complies with the requirements set out in the National Planning Policy Framework (NPPF), which states that all developments that generate a significant amount of vehicle movements shall be required to provide a Travel Plan.

- 1.9** Toat Café and Stanes Farm are located on the western side of the A29 just to the north of Codmore Hill, some 2.0km north of Pulborough and 5.5km south of Billingshurst. For clarity, a site location plan is attached at **Appendix 2**.

Local Highway Network

- 1.10** The application site has an approximate 270m site frontage onto the A29/Stane Street, a single carriageway road which is subject to a speed limit of 60mph. The site is currently served by three access points off the A29/Stane Street.
- 1.11** There is a footway on the east side of the A29 from the south until Stone House Farm, Stane Street some 740m to the north of the site. This allows pedestrians to walk alongside the footway, accessing facilities and public rights of way (PRoWs) adjacent to the site.
- 1.12** Edge of carriageway markings are present along Stane Street's length.
- 1.13** To the north, there is North Heath petrol filling station which is on the east side of the A29.
- 1.14** To the south, there is Black Gate Lane and Broomers Hill Lane in the form of a staggered crossroad junction before continuing south onto Codmore Hill and Pulborough.
- 1.15** A review of the adopted highway boundary plan reveals the extent of the highway. The land accommodates the entire width of the carriageway as well as the footway to the east and verge to the west. The full plan of the adopted highway boundary is presented at **Appendix 3**.
- 1.16** The development will accord with the West Sussex County Council car and cycle parking standards. Furthermore, and in accordance with the Building Regulations electric charging points will be provided for each dwelling.

2 Sustainable Transport Connections

2.1 This section will consider the existing accessibility of the site and the modes of transport existing in the area.

Walking

2.2 It is generally accepted that walking and cycling provide important alternatives to the private car and should be encouraged to form part of longer journeys via public transport. The Chartered Institute of Highways and Transportation (CIHT) has prepared several guidance documents that provide advice with respect to the provision of sustainable travel in conjunction with new developments. Within these documents, it is suggested that:

- Most people will walk to a destination that is less than one mile (circa 1.6 kilometres) – Planning for Walking, 2015;
- The bicycle is a potential mode of transport for all journeys under five miles (circa 8 kilometres) – Planning for Cycling 2015; and
- Walking distances to bus stops should not exceed 400 metres – Planning for Walking, 2015.

2.3 It is also recognised that walking is the most important mode at the local level and offers the greatest potential to replace short car trips, particularly those under 2km. The site is within 2km of Pulborough and the facilities it provides and is therefore well located, giving site users the option of using this alternative mode of transport for short trips. There is a continuous level footpath on the eastern side of Stane Street from the site to Codmore Hill and Pulborough.

2.4 In addition to the facilities within Codmore Hill there is a petrol filling station and shop just to the north of the site with an existing footway leading to it. The distance to the petrol station is approximately 200m from the proposed site access.

2.5 The distance of one mile (1.6km) is not the maximum that people are prepared to walk. In some instances, people will walk further to reach their destination.

- 2.6** Evidence from the National Travel Survey (NTS) data is that approximately 23% of journeys between 1 to 5 miles (1.6km to 8km) are undertaken on foot.
- 2.7** As such, providing new homes on the application site, within 2.0km of the facilities available within Pulborough, 200m from the local shop and garage and 1.3km from the local facilities at Codmore Hill such as a supermarket and restaurants would provide a realistic opportunity for trips to be made on foot and cycle.
- 2.8** A number of Public Rights of Way (PRoWs) are in close proximity to the site. Existing PRoWs PUL-2308 (bridleway), PUL-1997(1) and PUL-1986(1) provide convenient links from the site to local facilities away from the A29 trunk road. These also provide leisurely opportunities for residents walking or cycling in the local area.
- 2.9** The development will contribute to improvement/maintenance of the PRoWs where it is deemed relevant and viable to the site.
- 2.10** Parallel to the northern boundary of the site lies PUL-1986 which runs northwest, meeting PUL-1986-1 which extends north. PUL-1986 continues northwest before angling towards the west towards Black Gate Lane.
- 2.11** Another key PRoW in close proximity to the site is PUL-1997-1 which extends opposite the existing Toat Café east towards PUL-2308 which is a bridleway extending some 700m towards North Heath. A map showing the PRoWs is presented at **Appendix 4**.
- 2.12** Provisions may need to be made to widen the footway on the east side of the A29/Stane Street to accommodate all users including cyclists and pedestrians with push/wheelchairs, providing an attractive and direct route for residents towards Codmore Hill and Pulborough.
- 2.13** For all footways/footpaths within the internal site layout, these will be designed in conjunction with the CHA and MfS standards to accommodate all non-motorised road users.

Cycling

- 2.14** Cycling has the potential to substitute short car trips particularly, those under 8km. Furthermore, the research discussed in the preceding paragraphs suggests that a catchment of 9.15km should be used for those cycling to employment uses. Such research and guidance related to pedal cycles and of course e-bikes are more conducive to even further and more frequent travel.
- 2.15** A cycle isochrone plan has been produced which shows the facilities that are in cycling distance of the site. It can be seen that access can be gained to bus stops, local cycle facilities, churches, schools and leisure facilities. The isochrone plan has been presented at **Appendix 5**.
- 2.16** To encourage cycling, in addition to the well-planned internal layout, the site will deliver good quality parking facilities within the development, in line with West Sussex County Council and Horsham District Council's parking standards for new developments (discussed later in TA).
- 2.17** Moreover, cyclists can travel along any nearby bridleways such as PUL-2308(1) (shown in **Appendix 4**) providing a suitable cycle route to nearby facilities.
- 2.18** On top of the pedestrian footpaths and shared bridleways, there is an abundance of cycling routes within and around the local area that are of a suitable and safe standard to encourage cycle use. There are several off-road and on-road cycle routes within the local area which include the Burton Mill Pond and Mill Loop (32.7mi), Chantry Lane Loop (17.8mi) and Greatham Bridge Loop (8.34mi), which provide extensive routes for cyclists *and* pedestrians. These routes vary in length accommodating for users looking for short or long trips.
- 2.19** Both Pulborough Railway Station and Billingshurst Railway Station are within easy cycling distance of the proposed site, giving access to larger areas such as London Victoria via Gatwick Airport and Bognor Regis.
- 2.20** The proposed development will provide secure cycle parking in line with the LPA requirements within the parcels.

Buses

2.21 The nearest bus stops to the site are located on Stane Street approximately 300m north and 170m south of the site respectively. The service routes 69 and 100 pass the site along the A29, with the route 100 being an hourly frequency between Horsham and Burgess Hills (Monday to Saturday).

2.22 Table 1 summarises the bus services available at bus stops within the vicinity of the site, with their destination and frequency and route at [Appendix 6](#).

Table 1: Current bus services

Route No.	Route Summary	Mon-Fri			Saturday			Sunday		
		First	Last	Freq.	First	Last	Freq.	First	Last	Freq.
69	Alford – Pulborough – Worthing	09:15	n/a	1/day	n/a	n/a	n/a	n/a	n/a	n/a
	Worthing – Pulborough – Alford	13:20	n/a	1/day	n/a	n/a	n/a	n/a	n/a	n/a
Tuesdays and Fridays										
100	Horsham – Pulborough – Burgess Hill	07:16	17:50	1/hour	08:20	17:50	1/hour	n/a	n/a	n/a
	Burgess Hill – Pulborough – Horsham	06:41	18:06	1/hour	07:41	18:06	1/hour	n/a	n/a	n/a

2.23 In order to better serve the site and to promote bus travel as a realistic alternative to the private car, it is proposed to provide improved bus service facilities which would serve the development and existing residents.

2.24 Following liaison with the West Sussex County Council (WSCC) County Highways Team, a number of potential improvements to local bus service provision have been identified. These include the relocation of the existing bus stops to allow for increased access to/from the site. Furthermore, the current bus stop facilities within the vicinity of the site are limited in quality and provision and do not accord with standards for accessible and inclusive public transport infrastructure.

2.25 It is proposed to relocate nearby bus stops to be closer to the proposed site access. These can be provided and improved for access of residents from the site and will accord with LTN 1/24 standards whilst being incorporated into the design of the final access layout.

Community Transport Services

2.26 Pulborough offers several volunteer-led community transport options to support residents who struggle with conventional public transport. The Pulborough & District Community Care Association operates a volunteer car service for essential medical appointments, including access to a wheelchair-accessible vehicle; bookings require at least 48 hours' notice and passengers pay a small fee to cover fuel costs.

2.27 Additional options for medical travel include the NHS Non-Emergency Patient Transport Service and St John Ambulance Non-Emergency Transport, available to residents who meet specific medical eligibility criteria.

Rail Services

2.28 Pulborough Railway Station is situated south of the site, approximately 3.2km away and is therefore located well within cycling distance. Further, the 100-bus service runs past Pulborough Railway Station, allowing prospective residents to access the station via public transport if unable to walk or cycle. This station provides services to London Victoria via Gatwick Airport and Bognor Regis.

2.29 Similarly, the Billingshurst Railway Station is some 5km to the north of the site which provides services to Bognor Regis and London Victoria via Gatwick.

2.30 Both named railway stations provide a step-free access to both platforms as well as there being concourses at both stations with help points for queries, ticket machines and toilets. There is also cycle storage at both stations.

2.31 Table 2 provides a summary of the key rail services available at Pulborough Railway Station.

Table 2: Pulborough Railway Station Services

Service	Key Destinations	Frequency			Average Duration	
		Mon-Fri		Sat		Sun
		Peak	Off-Peak			
Southern Railway (SR)	London Victoria	1 every 30 mins (0602-2311)		1 every 30 mins (0634-2310)	1 every hour (0804-2204)	1hr 20mins
	Bognor Regis	1 every 30 mins (0710-2347)		1 every 30 mins (0637-2322)	1 every hour (0855-2355)	30mins

Provision of Car Club

2.32

The scheme will include a car club for an initial one car. The car club will allow residents to hire the car for a specified amount of time without the expense and commitment of car ownership. According to CoMoUK's 2024 annual report, on average each car club replaces 27 private vehicles. Residents outside the development in the local area would also be eligible to become members.

2.33

The following benefits from a site-specific car club proposal are set out below. Given the scale of the development (up to 100 dwellings), Enterprise advise the following:

- Minimum car club – up to 2 vehicles on a 3-year rolling contract, starting with one.
- Vehicle provided – petrol/hybrid – preference would be hybrid – EVs can be supplied provided correct charging infrastructure with minimum 7kw charging in place.
- Total cost - £36,000 excl. VAT.
- Car Club open to existing residents.

2.34

Further details regarding the proposed Car Club scheme will be outlined within the Transport Assessment.

3 Timescales

- 3.1** It is intended that a full Travel Plan based on this Framework will be prepared, approved and implemented within 6 months occupation of the proposed development, in accordance with guidelines.
- 3.2** Preparation of the Full Travel Plan (TP) will commence following occupation of the first 50 units, and will be informed by travel surveys obtained from the new occupants. This will ensure it is based on accurate survey data obtained from residents actually living on-site, thereby ensuring that realistic and achievable targets are set. Surveys shall be issued to each new resident, in addition to an annual survey across the whole site until 5 years after full occupation of the completed development.
- 3.3** The Framework TP will seek to maintain the trip rate from the site at a level consistent with that predicted within the Transport Assessment.

4 Objectives

4.1 Government guidelines outlined in NPPF (2026) Policy TR6 '*Assessing Transport Impacts*' states that a key tool to facilitate sustainable transport is in a FTP, and that a travel plan will be delivered and monitored to indicate how sustainable objectives can be achieved. A development that generates significant amounts of movement should be required to provide a FTP.

4.2 With consideration to current National, regional and local policies the main objectives of the TP will be as follows:

- reflect the vision for the development;
- change travel behaviour of residents;
- achieve environmental improvements in proximity to the redevelopment site;
- promote environmentally sustainable travel patterns through effective communication and marketing;
- ensure that all residents are aware of the range of travel choices available to them;
- minimise journeys to and from the site by car and;
- maintain travel patterns and identify opportunities to encourage travel by sustainable modes.

4.3 Given the nature of the site's use, the primary objective of the TP will be to focus on travel by residents. Residents will make regular trips and this represents the best opportunity to influence travel patterns and meet the objectives of the Plan.

5 Targets

5.1 In line with guidance set out on the West Sussex County Council website, all Travel Plans should contain an appropriate set of SMART Targets (Specific, Measurable, Achievable, Realistic, Timebound). These will seek to reduce the level of single occupancy car trips across time, post occupation of the development.

5.2 At present, there is no survey base from which targets can be developed. The existing modal split is based on the method of Travel to Work dataset from the 2011 census, for the Horsham 012 output area. Table 3 sets out the relevant figures.

Table 3: Modal Split (Existing)

Mode	% of Total Trips
Car/Van Driver	50.1
Car/Van Passenger	3.2
Motorcycle/Scooter/Moped	0.4
Public Transport	2.8
Pedestrian	2.5
Cycle	0.4
Work mainly at or from home	39.7
Other	0.9

5.3 The percentage of Horsham residents, within the output area of the site driving either a car or van to work is high, however, it is highly unlikely that all of this number will be travelling to work during the peak hours.

5.4 The target for the FTP will be to reduce the number of single occupancy car trips by 10% over 5 years following full occupancy of the site. Albeit a more refined Target will be suggested and agreed with the LPA following results of the first travel survey.

5.5 Table 4 has been prepared to show demonstrate the corresponding increases in sustainable modes.

Table 4: Proposed Modal Split (Year 5)

Mode	% of Total Trips
Car/Van Driver	40.1
Car/Van Passenger	4.2
Motorcycle/Scooter/Moped	0.4
Public Transport	7.8
Pedestrian	4.5
Cycle	2.4
Work mainly at or from home	39.7
Other	0.9

Travel Surveys

- 5.6** Because the site is partially occupied with existing uses including Toat Café, Stanes Cottage, mobile homes, barns and a car wash, initial travel surveys could be conducted whilst more in-depth travel surveys will be carried after the first 50 dwellings have been occupied, 12 months later, and every two years thereafter.
- 5.7** These travel surveys will be carried out in accordance with the guidelines for monitoring travel plans developed by TRICS. They will take two different forms.
- 5.8** Firstly, there will be a questionnaire survey of all residents conducted over one week asking for mode of travel information for different journey-purpose trips such as journeys to work, shopping, accompanying children to school, etc. Such a survey shall aim to receive a minimum response rate of 35% and those undertaking the survey will be entered into a prize draw.
- 5.9** The second part of the travel survey will comprise physical traffic flow and occupancy counts at the entry and exit point to the development so as to establish vehicular trip rates at different times of the day and over the day as a whole. The physical survey will include manual counts of pedestrians, cyclists and public transport users in order to accurately assess modal share. This physical survey will be conducted on two days at the same time as the questionnaire survey.

- 5.10** By utilising a common methodology, changes in car usage over time can then be determined. The reduction in reliance on the private car will be achieved via the Measures outlined in the following Section 6.

6 Measures

- 6.1** In order to meet the objectives and targets set out in this FTP, a range of measures are necessary, and these have been outlined in the following paragraphs.

Travel Plan Co-ordinator (TPC)

- 6.2** A fundamental, key, component of the Plan will be the appointment of a TPC (organised through the Site Management Company) who will liaise with a Residents Travel Group and the Local Authority to agree measures to encourage residents and staff to utilise sustainable forms of travel.

- 6.3** The responsibility of the TPC will include:

- overseeing the development and implementation of the Travel Plan in line with this FTP;
- provision and maintenance of public transport information;
- management of cycle parking at the development;
- designing and implementing effective marketing and awareness-raising campaigns to promote the Plan and utilise existing travel awareness campaigns such as 'walk to work week' and 'bike week';
- setting-up, co-ordinating and attending transport user groups;
- promoting the benefits of sustainable travel;
- surveying travel patterns and working on objectives and targets to reduce the reliance on the private car;
- negotiating with local taxi companies with the aim of securing travel discounts and a preferential service and advertising these to residents and staff;
- surveying travel patterns and working on objectives and targets to reduce reliance on the private car;
- co-ordinate the necessary data collection exercise required to monitor and develop the plan, and;
- liaise with residents and staff as well as the Local Authority.

Residents Travel Group

6.4 The Travel Plan Co-ordinator will be supported by a Residents Travel Group which will be formed through the Site Management Company. Invitations to this group will also be extended to the Highway Authority (WSCC) and the Local Planning Authority (LPA).

6.5 The Residents Travel Group will meet every 6 months during the first 3 years, and then annually for at least the following 7 years to coincide to when the developer would likely leave the site. Such a period will allow the Travel Plan to become well established. The Residents Travel Group will be continued by the Site Management Company following this initial period.

6.6 It is considered that with a development of this size, there is a high probability that there will be sufficient interest amongst future residents to join the Travel Group. In addition, with the Travel Group being organised through the Site Management Company, those residents who are members of the Travel Group will have an influence over the wider management of the site.

Travel Plan Welcome Pack

6.7 All residents will be issued with a Travel Plan Welcome Pack from which they can make informed decisions about the travel mode they select. The welcome packs will include details on all travel options available to them, as well as the services and amenities provided locally and will be supplied to each resident on first occupation. The provision of such information is essential in forming sustainable travel habits early before residents/staff settle into a habit of driving when a sustainable alternative may be more suitable. The Travel Plan Welcome Pack is attached at **Appendix 7**.

6.8 The welcome packs will include:

- Information on the aims and objectives of the Travel Plan, for example the benefits to the environment of reduced car use and the health benefits of walking and cycling.
- Information on personalised travel planning services.
- Information on services and amenities provided locally.
- Information on the formation of a Residents' Travel Group to afford those residents, who are interested, an opportunity to discuss the TP and suggest alternative measures/schemes.

- Maps showing the pedestrian and cycle routes in proximity to the site, including cycle parking locations, and destinations of local facilities with routes and journey times by walking, cycling and public transport.
- Train and bus service information including late night travel advice to highlight the services available.
- Advice on measures to reduce the need to travel such as details of existing car sharing databases in the area, and details of Car Club and cycle hire schemes.

Home Working and Home Deliveries

6.9 Each dwelling will be provided with superfast broadband to facilitate working from home which will in turn reduce vehicular trips to work.

6.10 A secure drop-off box will be provided for each dwelling to allow home deliveries to be scheduled when the occupants are at work etc. Delivery vehicles will be able to stop at the roadside to collect and deliver parcels in the same manner as on a typical public street. As these activities are generally of short duration, temporary stopping for loading and unloading purposes is considered acceptable and is not expected to adversely affect the operation of the highway network.

6.11 A parcel locker can be provided within the commercial area of the site, complementing the secure parcel drop-off boxes associated with each dwelling. The inclusion of a centralised parcel locker reduces the number of individual delivery stops within the development, improving delivery efficiency. This can also help reduce vehicle movements and contribute to the overall operational efficiency of the development.

Electric Vehicles

6.12 Consideration will be given within the site layout to the installation of the infrastructure to permit electric vehicle charging in line with Government Building Regulations.

Highway Works – Pedestrian/Cycle Links

6.13 As previously mentioned, the site is well located to take advantage of existing pedestrian facilities within Codmore Hill and Pulborough. However, where deemed necessary by the LPA, footpath/footway improvements can be made to cater for non-motorised road users.

6.14 To improve accessibility, improvements such as tactile paving can be installed at key crossings between the development sites and Codmore Hill, if deemed necessary and viable. The continuous footway from the site towards Codmore Hill can also look to be maintained to remove vegetation encroachment.

6.15 Pedestrian access will be achievable through crossing points located near the final site access as well as via a proposed footway on the western side of the A29/Stane Street which will join existing public right of ways to the north. Therefore non-motorised travel can be a viable option along quiet PRowS.

6.16 An amount of cycle parking to accord with the Local Guidelines will be available on-site which will allow residents and visitors to access the site and securely store their bicycles. The potential to secure discounts from local cycle stores will be explored, whilst information relating to local cycle routes will be provided within the information packs and briefly within the Transport Assessment.

Bus Service

6.17 It is proposed by WSCC to provide improved bus service facilities to serve residents of the scheme. Bus stops located near to the site along the A29/Stane Street are proposed to be relocated closer towards the site access to avoid long walking distances for residents. These bus stops will be in accordance with LTN 1/24 Bus User Priority, ensuring the appropriate safe and accessible use of these facilities.

6.18 The development will also provide complimentary bus taster tickets, valid for up to one month, to all prospective residents. This initiative is intended to encourage early use of local bus services, promote sustainable travel habits, and reduce reliance on private car journeys from the outset of occupation.

Car Club

6.19 In order to reduce the number of private car journeys generated by the site, the possibility of providing a car club has been explored.

6.20 To determine whether a development such as this would generate sufficient demand to warrant a car-share club, Enterprise have been approached and they have

confirmed that the size of development proposed would allow a car club to be viable. Enterprise have prepared a Car Club Proposal, attached at **Appendix 8**.

6.21 The Proposal provides the costs per car, with funding for 3 years, after which time Enterprise would expect the service to be self-funding.

6.22 It is envisaged that every dwelling unit will have their initial car club membership paid for by the developer and a certain amount of 'driving credit' will be included for each resident. This will allow each resident to experience the initial benefits of the car share scheme without incurring any costs. The club would also be available to existing residents living in the local area.

Newsletter

6.23 It will be the responsibility of the TPC once a Monitoring Report has been issued to the Council, to report on the results to staff and residents by means of a newsletter/email.

Car-sharing

6.24 The TPC will promote a car-sharing scheme for residents. The emails will provide literature promoting material and local lift-share databases such as www.liftshare.com, as well as matching people together on-site. Car-sharing may also prove beneficial at the beginning and end of the school term when shared trips may become more feasible.

Travel Plan Funding

6.25 Funding for the Travel Plan will be provided initially by the developer and the WSCC fees of £1500 initial evaluation fee plus annual monitoring fee of £3000 per annum for 5 years. Antonio Avenue Ltd. are aware of the potential time and cost implications of this work, and undertake to provide the necessary time and funding to ensure the nominated Travel Plan Co-ordinator can undertake the role to the best of their ability.

6.26 An indicative figure of circa £2,000 per annum covering an administration proportion of salary will be allocated to run the Travel Plan. This would total £10,000 over the 5 year period of the Plan.

- 6.27** This figure would cover the time required to run the Travel Plan, including regular updating of information, personal travel planning etc. The cost of cycle parking and car parking would be covered within the initial build costs. It is envisaged that one day a month will be provided for the TPC to undertake their duties.
- 6.28** Another on-going cost, over and above the day-to-day running of the scheme, is the annual monitoring report which would need to be submitted to the Authority.
- 6.29** To collect travel data on an annual basis, analyse and report on the results, the developer will be budgeting a further £1,000 per annum, totalling a further £5,000 over 5 years.
- 6.30** Whilst the actual costs will be properly realised once the Travel Plan has been up and running for a year, the developer will be budgeting an initial £15,000 to the Travel Plan for a five year period.
- 6.31** The following Actions, shown in Table 5, have been set with the aim of reducing single occupancy car trips and to encourage the use of more sustainable forms of transport.

Table 5: Actions

Action	By When	By Whom	Indicative Cost
Provide Travel Plan Co-ordinator	Three months before first occupation of the site	Developer	£15,000 over 5 year period
Provide travel information on website	On first occupation	Travel Plan Co-ordinator/ Developer	Included within TPC duties
Promotion of walking routes	On first occupation	Travel Plan Co-ordinator/ Developer	Included within TPC duties
Provision of cycling routes	On first occupation	Travel Plan Co-ordinator/ Developer	Included within TPC duties
Secure cycling discounts/vouchers	On first occupation	Travel Plan Coordinator	£3,500
Encourage use of public transport	On first occupation	Travel Plan Co-ordinator/ Developer	Included within TPC duties
Provision of new bus service facilities	Earlier of 50 occupations or 1 calendar year after first occupation	Developer	Circa £18,000 per bus stop
Provision of bus 'taster tickets'	On first occupation	Developer	£17,500

Conduct first travel survey of staff/visitors	Within first three months of opening	Travel Plan Co-ordinator	£1,000 per annum
Survey prize	Following completion of each travel survey	Travel Plan Co-ordinator	£25 for each survey.
Prepare revised TP with regards to data gathered from initial staff/visitor survey and agree target reduction over first 5 years. Submitted for approval by WSCC	Within three months of development being occupied	Travel Plan Co-ordinator	£1,000 per annum
Conduct further monitoring surveys to track progress against agreed target	Once every three years	Travel Plan Co-ordinator	£1-2,000 per annum

7 Ongoing Management

- 7.1** The ongoing management of the TP will be conducted by the TPC appointed by the developer, to ensure that the measures outlined within the FTP are implemented and that suitable monitoring of targets is undertaken.
- 7.2** The TPC will be appointed prior to first occupation, in order to ensure someone is on-site during the early stages of development. The details of the TPC will be provided by the Local Planning Authority (LPA) prior to first occupation and details of any changes in personnel will be forwarded as necessary.
- 7.3** The TPC will liaise directly with the Residents Association regarding the on-going management of the Plan.

8 Monitoring

- 8.1** In order to ensure the measures outlined in this TP are achieving the set targets, monitoring will need to take place at regular intervals. Regular monitoring surveys should be undertaken to determine whether the targets are being achieved.
- 8.2** Within three months of the development being occupied, and subsequent the Full Travel Plan will be prepared and submitted to WSCC for approval.
- 8.3** To determine the initial travel characteristics of the site, a travel questionnaire will be submitted alongside the Travel Information Pack. The surveys will be undertaken at intervals of every other year after occupation, and this programme of surveys will continue until five years after full occupation of the final phase of development. A sample travel questionnaire has been attached at [Appendix 9](#).
- 8.4** The results of the surveys shall be forwarded to the relevant Authorities within 3 months of the being received, with the TPC being available to meet with the Authority to discuss the findings, if required. The information submitted will take the form of a 'Monitoring Report' and will summarise the results of the survey and determine the current modal split. This will then be compared with the targets to determine whether the Travel Plan measure are having the desired effect. Should this not be the case, promotional measures will be increased as necessary.

1 Welcome

To whom it may concern,

Welcome to Toat Café! We are delighted to share this **Travel Plan Welcome Pack** with you.

This pack is designed to provide you with comprehensive information on active forms of travel available in and around Toat Café. By exploring these options, you can contribute to reducing single-occupancy car trips, enhance your personal well-being, and enjoy the environmental benefits of active travel in the local area.

Inside, you'll find details about walking and cycling routes, public transportation options, and other sustainable travel methods. We've also included information on where to access additional resources should you need further guidance.

The aim of this Travel Plan is to promote active and sustainable travel choices within the community. By doing so, we hope to make Pulborough a greener, healthier, and more connected place to live and work. To help track the effectiveness of this Travel Plan and gather your valuable feedback, we will conduct travel surveys every two years over the next five years. Those who participate in these surveys will have the chance to be randomly selected to win a voucher as a token of our appreciation.

Thank you for taking the time to engage with the Travel Plan and for helping make the local area a fantastic community for all.

2 Travel Plan Information

PURPOSE OF THE TRAVEL PLAN

This Travel Plan aims to promote sustainable travel options and reduce reliance on single-occupancy vehicles. By encouraging walking, cycling, public transport use, and carpooling, we can strive to create a more connected, environmentally friendly, and efficient travel network for everyone.

WHAT CAN YOU DO?

- Walk or Cycle
- Public Transport
- Carpooling
- Support local initiatives
- Take part in travel surveys

TRAVEL PLAN COORDINATOR

Your Travel Plan Coordinator is responsible for ensuring the success of the Travel Plan. They play a key role in:

- Updating the Travel Plan Welcome Pack regularly
- Conducting travel surveys
- Promote sustainable travel events
- Provide support and guidance

For any questions, suggestions, or support regarding the Travel Plan, please feel free to reach out to your Travel Plan Coordinator:

Name: Bellamy Roberts
Email: info@bellamyroberts.co.uk
Phone: 01256 703355

3 Walking

BENEFITS OF WALKING

It is recommended that the average adult needs at least **150 minutes of moderate intensity activity a week**. One of the easiest ways to achieve this is by walking! Walking has many other benefits which include the following:

- improves cardiovascular fitness, strengthens muscles and bones, enhances flexibility, and aids in weight management.
- boosts mood, reduces stress and anxiety, enhances cognitive function, and improves sleep quality.
- provides opportunities for social interaction, community involvement, and exploration of surroundings.

For the best walking trails in Pulborough, follow this: [10 Best walking trails in Pulborough | AllTrails](#)

Find out about **events happening in Sussex!**

For more information scan the QR code below:

USEFUL APPS AND WEBSITES

MapMyWalk: tracks your walking metrics, saves your workouts for review on the app or website, and includes social features to share routes and motivate friend [mapmywalk.com](https://www.mapmywalk.com).

Strava: enables users to measure distance, time, elevation, calories, and even heart rate when synced with a heart rate monitor, while also offering features for route creation, sharing, heatmaps, and social networking with friends and family [strava.com](https://www.strava.com).

Fitbit App Mobile Tracker: The Fitbit app lets you track walking workouts and daily steps using your phone's GPS and motion sensor, review detailed stats, and challenge friends with virtual adventure races—all without needing a Fitbit device community.fitbit.com.

4 Cycling

The local area is fantastic for cycling, offering a variety of scenic off-road cycle routes to explore. [Pulborough - Bikemap](#) provides a useful website showing a map of all cycle routes throughout the local area.

Fun Fact: Cycling is so energy-efficient that you can travel about three times faster than walking using the same amount of energy

BENEFITS OF CYCLING

Cycling is immensely beneficial for your physical and mental well-being:

- keeps you fit, boosts energy, and improves heart health without needing a gym
- releases endorphins, reduces stress, and promotes a positive mindset
- avoid fuel costs, parking fees, and public transport fares with cost-effective cycling
- improves focus, energy, and productivity at work

USEFUL APPS AND WEBSITES

MapMyRide: allows you to plan routes, track your rides, monitor performance, and connect with a community of riders [mapmyride.com](https://www.mapmyride.com).

Bike Map: a free, comprehensive app for cyclists, offering route planning, real-time navigation, and access to a global community of riders to explore and share cycling paths [bikemap.net](https://www.bikemap.net).

Komoot: uses the OpenStreetMap database to plan road, mountain bike, gravel rides, and commutes, prioritising bike-friendly, efficient routes tailored to your fitness level. It provides detailed route insights, including difficulty, elevation, and surface types, and offers real-time navigation with easy adjustments [komoot.com](https://www.komoot.com).

5 Bus Travel

Your nearest bus stops are located on Stane Street, about a 2-4 minute walk. Buses run all throughout the day (Mon-Sat) to [Worthing Marine Parade](#) and [Horsham Bus Station](#) via the **69** and **100** services respectively.

These bus services are also available to [Burgess Hill](#) and [Alford](#) and travel via [Pulborough](#) and [Billingshurst](#). All bus services from these stops are operated by **Compass Travel** and run every hour to key facilities within key urban hubs.

As of July 2026, a Compass Travel single fare is capped at is £3.00.

69 COMPASS TRAVEL BUS

TO **Alford**

TUE & FRI 13:20 THROUGH TO 14:41

TO **Worthing**

TUE & FRI 09:15 THROUGH TO 10:15

TO FIND OUT MORE ABOUT PURCHASING BUS PASSES AND GET THE BEST DEALS, TRY OUT THE **QR CODE**:

6 Train Travel

Your nearest train station is **Pulborough Railway Station**, about 7-minute drive or 13-minute cycle. Trains from here go to London Victoria and Bognor Regis.

For more information, visit
southeasternrailway.co.uk.

Up to date times and service information can be found on the National Rail website:
nationalrail.co.uk

Travel Smart, Save More!

Visit the
Railcard.co.uk
website to find
out how you
can apply.

Railcards offer discounts on train travel in the UK, making them a great option for saving money. There are several types of railcards available, including 16-25 Railcard, Senior Railcard, Family & Friends Railcard, Two Together Railcard, and Disabled Persons Railcard. Each card has its own eligibility criteria, such as age restrictions, relationship requirements, or disability status. Most railcards require proof of eligibility, such as age verification or proof of disability. They typically provide a third off the cost of most rail fares, making them an excellent way to save on frequent train journeys.

USEFUL APPS AND WEBSITES

National Rail: main service for booking and managing train travel in the UK. The National Rail app offers features such as real-time updates, ticket purchases, journey planning, and access to travel alerts, making it easy to manage and plan journeys nationalrail.co.uk.

Trainline: allows users to easily book and manage train travel across the UK and Europe. It provides features like live train updates, ticket purchasing, journey planning, and real-time travel information, ensuring a seamless travel experience thetrainline.com.

7 Car Travel

ECO DRIVING TIPS:

Before the drive...

- **Lose drag** – boxes and roof-racks add to your fuel consumption
- **Plan your journey** – check traffic news before you go and don't get lost!
- **Walk or cycle** – if it's only a short journey, maybe you should reconsider your travel options
- **De-ice your car** – start scraping instead of letting your car idle

While driving...

- **Careful when using air con** – your fuel consumption, though less noticeable, does go up when you're driving slowly with air con
- **Stick to the speed limit** – driving faster consumes more fuel
- **Maintain a good speed** – constant changing between driving fast and slow uses more fuel

DID YOU KNOW...

- The average annual car insurance spent per year in England is **£700-£730**
- The average amount per year spent on petrol is **£1,200** and for diesel this is **£1,500** (although prices keep rising!)
- The average Brit spends about **15 days** per year in a car

USEFUL APPS AND WEBSITES

Liftshare: a car-sharing platform that connects people traveling in the same direction, helping to reduce travel costs and carbon emissions. It promotes sustainable travel by making it easy to find or offer shared rides within local communities or workplaces liftshare.com/uk.

Enterprise: helps organisations promote sustainable travel by enabling employees to share commutes, reducing parking demand and environmental impact. It enhances workplace sustainability initiatives while cutting travel costs and fostering a collaborative culture among staff www.enterprise.co.uk.

APPENDIX 8

Enterprise Car Club Proposal

Car Club proposal for Toat Café, Stane St, Pulborough, RH20 1DN.

February 2026

Toat Cafe Car Club - Introduction

Who are we?

Enterprise Car Club is an hourly, self-service car rental company, available to members 24/7/365. Vehicles can be picked up in and around a city or region and booked in advance or at the last minute. Located in over 180 UK cities and communities our 100,000+ members have access to over 2,500 cars and vans.

Enterprise Mobility is the parent company of Enterprise Car Club. A car club is a natural extension of the local car-rental service that Enterprise Rent-A-Car has pioneered in the UK over the last 20 years.

Why Enterprise Car Club?

Enterprise Car Club will be able to provide new communities with a wider variety of vehicles backed by the Enterprise Rent-A-Car neighbourhood network and award-winning customer service.

Enterprise Car Club already hosts over 200 vehicles at developments across the UK. These range from City Centre residential developments in London and major regional cities (e.g., Manchester, Leeds, Bristol, Edinburgh, Glasgow, and Newcastle), to mixed use developments, business parks and non-city centre locations on the fringes of cities or outside major conurbations.

What role does shared mobility play in developments?

The mobility decisions and behaviour of residents of new developments/communities (business or private) are influenced by their mobility needs in and around their new location, but also across the region and country. A good range of mobility solutions in one and not the other risks travel behaviours remaining focussed on vehicle ownership and far lower adoption of more sustainable and multi-modal options.

Enterprise has an already established and rapidly expanding national car club and car rental network providing shared mobility from Inverness to the Isle of Wight, Northern Ireland to East Anglia. Large urban centres are covered but towns and smaller communities are also now served by Enterprise Car Club and Enterprise Rent-A-Car. By the time this new development starts to be occupied mobility solutions from Enterprise will be available across the UK integrated physically and digitally alongside other sustainable modes such as public transport, active travel, and shared mobility options. Enterprise Car Club already has vehicles within 500 metres of 181 UK train station. These stations represent 34% of UK national rail journeys.

How does Enterprise provide an alternative to car ownership?

Enterprise Car Club is integrated with Enterprise Rent-A-Car as a brand, business, and proposition for residents of the development. This means that personal members of Enterprise Car Club will receive a discount with Enterprise Rent-A-Car and can access all its services in the immediate area around the development and across the UK. Together this integrated approach provides the most powerful alternative to car ownership for individuals and businesses.

Enterprise in the area around Toat Café, Stane St, Pulborough, RH20 1DN.

Enterprise Car Club does not have a presence in the local area (see first map). Discussions are ongoing to expand this in partnerships with councils, train operators and developers. This car club presence is supported by a strong branch presence (see second map below) and Enterprise also has “[month or more](#)” and commercial vehicles options in the region via [Enterprise Flex-E-Rent](#).

Combined, these options make Enterprise the best possible mobility partner for the Toat Cafe community whether residents need a car for a few hours, days or months.

The screenshot displays the Enterprise Car Club website interface. At the top, there is a navigation bar with the logo and links for LOG IN, MENU, REGISTER, and BUSINESS & PUBLIC SECTOR. Below the navigation bar is a map of the UK with green dots indicating car club locations. A legend at the bottom left of the map shows 'In Network' (green dot) and 'Out of Network' (grey dot). To the left of the map, there is a list of four branches, each with a numbered icon, name, address, and a 'Select' button. The branches are:

- 1 Horsham**
62 Park Street
Horsham, ENG RH12 1BX
Hours and location details > Select
- 2 Worthing**
175-177 Tarring Rd
Worthing, ENG BN11 4HL
Hours and location details > Select
- 3 Haslemere**
Sturt Road Unit 3
Haslemere, ENG GU27 3RX
Hours and location details > Select
- 4 London Gatwick Airport**
Gatwick Airport South Terminal
Lower Forecourt Road
Crawley, ENG GU14 0ND

To the right of the list is a zoomed-in map of the Horsham and Worthing area, showing the locations of the four branches marked with numbered icons (1, 2, 3, 4) and a search bar at the top right.

The National Car Club

Toat Cafe residents will also have access via their Car Club membership to over 2,500 vehicles across the UK.

The map below shows the current Enterprise Car Club network which is expanding rapidly. Residents who join Enterprise Car Club can use any of these vehicles and if bookings are cancelled more than 5 hours in advance there are no charges. Enterprise locates car club vehicles with public transport in mind enabling members to travel in combination with public transport and only driving for the smallest possible portion of the journey. One example of this is Enterprise Car Club's presence along the LNER network connecting York to Darlington, Durham, Newcastle, Berwick-upon-Tweed, and Edinburgh to the north and Wakefield, Doncaster, Newark, Peterborough, and London Kings Cross to the south.

Car Club Proposal for Toat Café, Stane St, Pulborough, RH20 1DN.

Given the scale of the development (100 dwellings) we advise the following:

Proposal	Proposal Details
Minimum Car Club	Up to 2 vehicles, on a 3-Year Rolling Contract. Starting with 1, second to be added based on demand levels of 40% utilisation.
Vehicles provided	Petrol/hybrid/EV - EV's can be supplied provided correct charging infrastructure with minimum 7kw charging/RFID card/fob access in place. Zero vehicle maintenance and cleaning responsibilities.
Costs	£36,000 ex VAT for Non-EV or £45,000 ex VAT for an EV.
Additional vehicles	Can be provided when commercially viable to do so at no additional cost. Enterprise and the client will develop a utilisation model which will trigger additional vehicles in response to demand. This model will consider utilisation levels above 40% and the distribution of demand across the week and working week. If you wish for a larger car club fleet on site when the above model does not deem it commercially viable, additional vehicles can be provided at £12,000 ex VAT for non-EV or £15,000 ex VAT for EV.
Incentive for site only residents	3 year's free membership of Enterprise Car Club and £50 drive time credit.
Offer qualification	Will be provided to multiple residents at the same address and throughout the contracted period.
Additional benefits	All residents joining would also be able to get a discount with Enterprise Rent-A-Car. The combination of car club and car rental is very attractive to people as an alternative to car ownership. This would be promoted via a leaflet customised to the offer (see below example), via digital/social media marketing and events. Car Club members holding both a corporate and personal membership can link their accounts, so they can have a single sign on to the car club booking system.
Corporate membership	Any Businesses located at the development site will be provided with free Enterprise Car Club membership for themselves and their employees.
Promotion	Attendance at sales and promotional events
Data	Creation of reports and statistics for the developer and council.

One Enterprise and Future Mobility

Car Club usage can be supported and supplemented day traditional car rental (typically for longer journeys) via a local branch and the free “We’ll pick you up service” or a delivery service to the business park. One-way hires are available via the traditional Enterprise Rent-A-Car network.

Enterprise has developed “Enterprise Travel Direct” ETD to assist businesses wishing employees to have access to both car club and daily rental mobility options alongside the use of employee’s own cars for business mobility (grey fleet). ETD allows businesses to load the parameters of their travel policy/hierarchy into the system to manage and direct their employees to the travel option most suitable to their needs in terms of cost, carbon savings etc.

Globally, Enterprise is at the forefront of new mobility solutions and over \$2 billion has been invested in a variety of businesses and technologies that will be critical in solving many of the current and future mobility challenges.

Everything we do, we do with our Standard of Care. We promise to put you first, with exceptional customer service and vehicles that are maintained to our high-quality standards. We’re continuously innovating to help move the world forward—including new ways to go the extra mile for you, so you can get on the road with confidence, no matter where life takes you. To make this promise a reality, our service is guided by our Standard of Care. See below for more details.

No-Touch Transactions

We want your rental process to be as intuitive and easy as possible. So, we’re increasing our efforts to provide no-touch digital tools that provide less contact without sacrificing service.

Exceptional Customer Service

Great customer service starts with listening. We take the time to understand your needs, so we can offer the best solution. This attention to our customers is what has made us a global leader in mobility. Customers come to us—and stay with us—because we always strive to deliver an exceptional digital experience.

Vehicle Maintenance & Safety

Nothing is more important than the safety of our customers. We follow or exceed manufacturer guidelines for tire replacement and oil changes to help ensure your experience is safe and uninterrupted.

Visual Inspection of Every Vehicle

As part of our Standard of Care, we provide members with guidance and tools to perform a visual inspection before each trip. This extra step includes documentation of the vehicle condition before each rental, offering you peace of mind so you can be focused on the road ahead.

Member Compliance with Car Club Code

Car Club requires members to be community-minded as they make use of our shared vehicles in line with the [Car Club Code](#).

Example Marketing Collateral

A range of comms can be shared with developers once onboarded. Including print/digital flyers (example below), emails, social posts & intranet copy.

The flyer is a two-page spread. The left page features a couple in a car with the headline 'Ready, set, drive' and a list of benefits. The right page shows a white Enterprise Car Club car with the headline 'Your four walls come with four wheels' and details about a free membership and driving credit offer. Both pages include the Enterprise Car Club logo and a QR code for sign-up.

Ready, set, drive

It's easy to get on the road with Enterprise Car Club.

- A vehicle right here in Langley Gate
- 1,300+ roadside vehicles across the UK
- Book and unlock vehicles with your phone
- 24/7/365 access

APPENDIX 9

Sample Travel Questionnaire

RESIDENTIAL TRAVEL SURVEY

Introduction

As part of the monitoring process for the Residential Travel Plan, we are currently conducting a travel survey. We would therefore be grateful if one member of your household could complete this brief survey which will help us to better understand your travel patterns, needs and how we may be able to assist with your travel requirements.

A Residents Travel Group is in operation where you can discuss the Travel Plan and suggest alternative measures and schemes in order to meet the targets of the Plan. If you would like to join the Residents Travel Group, please get in touch with the Travel Plan Coordinator, details below:

TPC Contact Details

All residents who complete this survey will be entered into a prize draw. Please provide your name and address in the space below to be included within the draw.

The survey will take approximately 5 minutes to complete and all responses will be treated confidentially.

Name:

Address:

Q1:	Did you find the transport information provided in the Welcome Pack easy to understand?	✓
	Yes	
	No	
	Did not receive Welcome Pack	

Q2:	Does your household have access to...	✓
	1 car?	
	2 or more cars?	
	N/A	
	Bicycle	
	Motorbike/Moped	

Example Residential Travel Survey

Q3:	In a typical week how do you normally travel to the following and how often do you make this journey?			
	Journey to	Postcode of Workplace	How	How often per month
	Work			
	University			
	Grocery Shopping			
	Other Shopping			
	Leisure (Gym/Pool/Cinema)			
	Health (GP/Hospital)			
	Other (Please State)			

How:

- Car on your own (C)
- Car share (CS)
- Public Transport (P)
- Walk (W)
- Cycle (C)
- Other (O)

Q4:	If you drive to work, where do you normally park?	✓
	Free parking at work	
	Paid parking at work	
	Free on-street parking	
	On-street paid parking	
	Park and Ride	
	Other	

Q5:	If you drive to work how many passengers do you carry (excluding yourself)?
