

HORSHAM DISTRICT COUNCIL CONSULTATION

TO: Sophie Moore	Horsham District Council – Planning Dept
LOCATION:	Storrington Squash Club, Greyfriars Lane, Storrington, West Sussex, RH20 4HE
DESCRIPTION:	Approval of details reserved by condition 4i (Written Scheme of Archaeological Investigation) to approved application DC/25/1951.
REFERENCE:	DISC/26/0186
RECOMMENDATION:	Advice / No Objection / Objection / More Information / Modification / Refusal
SUMMARY OF COMMENTS & RECOMMENDATION: The Written Scheme of Investigation for a Programme of Archaeological Monitoring prepared by Archaeology South East is acceptable and is sufficient to discharge part i of the archaeological condition.	
MAIN COMMENTS: The applicants have submitted a Written Scheme of Investigation (Archaeological Specification) for a programme of Archaeological Monitoring (Watching Brief at this site. The document has been prepared Archaeology South East and the work will involve the monitoring of all intrusive groundworks by an attendant professional archaeologist in order that any archaeological remains that may be revealed are identified and recorded. I can confirm that the proposed scheme of work is acceptable from the archaeological point of view and so I have no concerns towards the development and monitoring work now taking place on the site. When satisfactory details of the results of the work have been received, I will be able to recommend the most suitable way for the application to proceed from the archaeological viewpoint. As this may include the need for further archaeological assessment, analysis and publication work should significant archaeology be encountered during the work, part ii of the archaeological condition (4) should remain until a report has been received and any additional works that may be required identified.	

ANY RECOMMENDED CONDITIONS:

The partial requirements of the condition have been satisfied, as the Council's consultant Archaeologist is satisfied with the content of the submitted Written Scheme of Archaeological Investigation (WSI). The archaeological fieldwork should be implemented in accordance with the WSI. The archaeological site investigation and post investigation assessment will require submission to and subsequent approval by the Local Planning Authority.
