SUBJECT:	DC/25/1023 Relocation of existing farm yard manure storage, construction of a silage clamp and construction of a slurry lagoon incorporating importation and use of materials and all associated engineering works.
DATE OF SITE VISIT:	N/A
RECOMMENDATION:	Advice

This application has been dealt with in accordance with the Development Control Scheme protocol for small scale proposals.

WSCC in its role as Local Highway Authority (LHA) has been reconsulted by the Local Planning Authority (LPA) following the applicant's submission of a Construction Management Plan, as was originally requested in the LHAs initial consultation response, dated 19/08/2025.

Having reviewed the submitted Construction Management Plan, the LHA are satisfied with the details provided, and would raise no highway safety or capacity concerns.

In summary, the LHA does not consider that this proposal would have an unacceptable impact on highway safety or result in 'severe' cumulative impacts on the operation of the highway network, therefore is not contrary to the National Planning Policy Framework (paragraph 116), and that there are no transport grounds to resist the proposal.
