

Dear Halima,

I am satisfied the proposed repairs and alterations are necessary and will ensure the preservation of the building as a whole. The roof timbers have clearly been affected by weight and water ingress over time and the roof structure needs additional support. I am satisfied the engineer's report is balanced between creating a structurally stable roof and retaining as much historic fabric as possible. I have suggested conditions below.

Regards,
Seán

LB06 Site Meeting Before Works Commence

Pre-Commencement Condition: Before any work begins on site, the person(s) responsible for supervising the works and the main contractor must meet the conservation officer of the Local Planning Authority, on site or as otherwise agreed, to confirm that all the details attached to the listed building consent are understood and can be fully complied with.

Reason: As this matter is fundamental to ensure that the significance of the designated heritage asset, and the character, appearance and integrity of the building, is not prejudiced, thereby preserving the special architectural or historic interest which it possesses, and to comply with Policy 34 of the Horsham District Planning Framework (2015).

LB12 Making Good

Regulatory Condition: All building works, finishes, and making-good, both internal and external, shall match the relevant existing work in respect of method, detail, and finished appearance unless otherwise approved in writing by the Local Planning Authority. Where new materials are to be used externally, the colour match shall make allowance for future weathering.

Reason: To ensure that the significance of the designated heritage asset, and the character, appearance and integrity of the building, is not prejudiced, thereby preserving the special architectural or historic interest which it possesses, and to comply with Policy 34 of the Horsham District Planning Framework (2015)
