DESIGN AND ACCESS STATEMENT REGARDS APPLICATION FOR NEW LEAN TO

[redacted]

Due to the councils actions we are having to look at alternative ways to continue our rewilding or we will have to stop and disband our volunteers. With no natural light we will not be able to make full use of the first floor any more. We are therefore looking to free up space on the ground floor so volunteers can use part of that as a muster area. We now apply to erect another lean to similar to the one your planning department refused, but was over turned by the Planning Inspectorate when we appealed. The additional roof area could enable us to collect more rain water for use on the 150 newly planted trees. We will also request in a separate application to improve our wooden shed down by the pond that we have created. Permission for this shed was also refused by your planning department, but our appeal against your planning departments refusal was once again upheld by the Planning Inspectorate.

[redacted]

[redacted]

The existing lean to.
Councils refusal overturned on appeal.
Brown powder coated contoured steel roof on wooden supports.

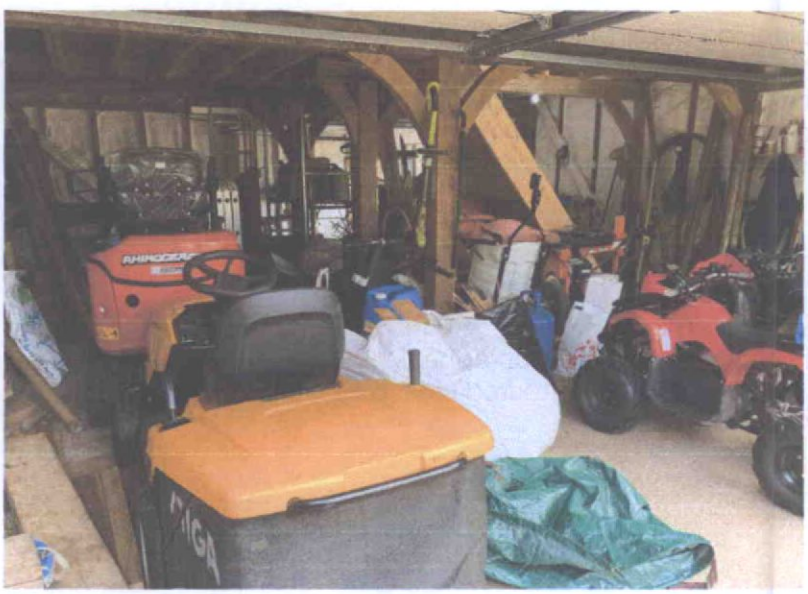

DESIGN AND ACCESS STATEMENT REGARDS APPLICATION FOR NEW LEAN TO

West elevation of barn

Photograph taken from the west but showing the north side of our barn where we would like to erect a new lean to shelter in order to free up space on the ground floor for our volunteers

Ground floor fully used at present with equipment used for the maintenance of Matt's Wood, the Catholic cemetery and the rewilding or Priory Fields.
