Comments Details

Commenter Type: Neighbour

Stance: Customer made comments in support of the Planning Application

Reasons for comment:

Comments: This is a great initiative and will be so beneficial to the village, pre-school, primary school and everyone who uses the hall through all the community events and kids parties that take place. We moved into the village with toddlers when the old playpark was still there and it was an amazing draw and hub for all the kids, families and wider communities to meet up and play is so beneficial to all children. We also have more and more families moving into the village so this gives everyone a great focal point / place within the community. I wholeheartedly agree, support and will use as my kids grow up in the village.

Kind regards
