For the attention of Giles Holbrook.

Good morning Mr Holbrook,

I would appreciate your comments regarding the above development at the top of Downsview Avenue, Storrington, since I have always been of the belief that the houses were to be supplied with water via bore holes and a transfer of credits from the South Lodge Hotel in Horsham was to be put in place. However, I am now advised that the water supply to the development will be through the normal water main and I would be grateful if you would confirm this to be the case.

Residents in the immediate vicinity have had to experience inconvenience for several years on and off whilst the boring contractor carried out work and yet I am now told the water was not of suitable quality and it is instead proposed to use the boreholes for surface water drainage.

If the above is correct then this represents a major change to the planning application since the question of water neutrality comes into play, which may well have changed the decision on passing the application.

I would be pleased to receive details of the true situation from you.

I also note that on the Planning website the application is shown as "Recommendation and/or Committee" which presumably means that it has not yet been agreed and yet the developer is laying utility services into the site along Downsview Avenue and I would welcome your comments on this.

Yours sincerely
