Stance:	Customer objects to the Planning Application
Reasons for comment:	- Other
Comments:	Hi I have commented previously in opposition to this Planning Application, and remain firmly opposed, for all the same reasons. I write again to reemphasise my opposition, and to note the following new information of relevance: I've recently learned from a neighbour, that they have been approached with a request for access to land from Southern Water. Southern Water cite a proposal to close Itchingfield Wastewater Treatment Works, and to reroute the wastewater load down to Barns Green Wastewater Treatment Works. I (and many others in their objections to DC/25/2057) have previously remarked at the current

under-capacity of the BG WTW, as one of a number of reasons that the Planning Application should be refused.

Already, in its current state, BG WTW is insufficient for the load placed on it by existing housing usage (despite the assertions of SW to the contrary: SW seem to be overlooking, or ignoring, facts and evidence, and their representation that the BG WTW has capacity is therefore woefully misplaced and not a fit basis on which to base any Planning decision).

To close Itchingfield WTW and redirect the load from there to Barns Green WTW will heap further overage, and compound what is already a utility disaster and an environmental tragedy.

I urge you to weigh the above comments in ongoing considerations of DC/25/2057, and to conclude that the Planning Application should be REFUSED.

Regards
