Tree stands approximately 8m tall with a crown width from main stem of 2.5m on North, 1.5m on East, 2.5m on South and 5m on Western aspect.

Tree in communal garden. 10 to 15 degrees lean. Tree is in slow decline, fugal brackets around base on Southern and Western sides. Surface facture on main stem on the Western side. What seems to be damage from a small fire at base on the SE corner.

Growing concerns from site staff for the residents over the condition of the tree.
