

Heritage Statement

Upon evaluation, it is considered, that the works involved in this application will have no impact on any surrounding Listed Buildings. There is an established treeline and embankment between the site location and the Listed buildings, mitigating any potential visual impact. The site is currently part of the farmyard area, used for the storage of agricultural machinery. The container will be sited within close proximity to the existing farm buildings, and sit below the treeline that borders the site from the A29. The size and scale of the proposed clad container is minor. Furthermore, the site is not located in a Conservation area and therefore the project will have no effect on this.
