Comments Details

Commenter Type:	Neighbour
Stance:	Customer made comments neither objecting to or supporting the Planning Application
Reasons for comment:	- Loss of General Amenity - Trees and Landscaping
Comments:	My initial reading of the start of the supporting statement gave some concern over the apparent plan for future development given this is already a major sized set of buildings in a key location on corner of Rock Rd and Merrywood Lane, and recognising a previous application for oak felling was denied 2 years ago. On reading further I see the extent of disease reported and the

plan for action. I hope that a detailed review by HDC experts will be undertaken recognising that the plan involves potential 16 trees felled to a 2m stump and 6 trees felled completely. This will impact the view from Rock Road /Merrywood Lane for walkers, cyclists, horse riders as well as vehicles, and the result will be inconsistent with the situation in other properties in the region which are mostly not visible from the road. The tree replanting plan needs detailed consideration by HDC.
Finally to make a polite request, on behalf of Heath Common residents in my role as Chairman of the Hampers Lane road group, to retain the mounting of the convex safety mirror which is currently located on corner most tree on this property location, having been there for many years as a safety feature to help drivers at the dangerous junction of Rock Road with Hampers Lane

---

Kind regards
